

CHIPBLASTER V-SERIES HIGH PRESSURE COOLANT

CHIPBLASTER V-SERIES Modular Premium Models

Chipblaster V-Series high pressure coolant systems are variable rate high pressure units. These units are premium and modular units with options

	V-40	V-60	V2-80	V2-120
Volumes	40 Liters Per Minute	60 Liters Per Minute	80 Liters Per Minute	120 Liters Per Minute
Pressures	70 bar			
Standard Coolant Tank Capacity	380 liters	480 liters	380 liters	480 liters

- V-40 and V-60 standard units include one module, product images shown include Chipblaster Chiller Series (second module)
- V2-80 and V2-120 standard units include two modules, product images shown include Chipblaster Chiller Series (third module)

CHIPBLASTER V-SERIES HIGH PRESSURE COOLANT

V-40

The Chipblaster V-40 goes well beyond conventional coolant systems to automatically provide optimal pressure and flow for all applications. This assures more accurate cutting, faster throughput and longer tool life. All in an affordable, custom-designed unit requiring minimal floorspace.

Most high-pressure coolant systems concentrate only on chip management and pump at a fixed rate, regardless of need. This wastes energy, especially when using smaller tools, as a majority of the coolant is simply dumped back into the tank. Chipblaster V-40 automatically delivers just the right amount of coolant to maintain optimal pressure and flow for each specific application, thus coolant is never bypassed. The result is energy savings and extended tool life. The Chipblaster 380 liter (100 gallon) standard tank with baffles radiates excess heat to maintain acceptable coolant temperature and reduce foaming.

Model	Flow	Pressure	Outlets	Tank	Hydracell
V-40	40 liters per minute	70 bar	1	380 liters	Optional
Options		Dimensions			
Oil Skimmer Chiller Mist Collector Cyclone Filtration Heater Wash Wand	1.88m x 1.57m x 0.71m				

V2-80

The Chipblaster V2-80 can operate as two completely independent 40 liter (10 gpm) modules or combine to provide high pressure and very high volumes 80 liters at any time during the same program.

This is the “gold standard” for high pressure coolant systems. It automatically pumps just enough volume to maintain full pressure. Other systems pump a fixed rate that is always too much or too little causing foam, heat, and short filter life. Ideal for machine tools up to 40kw (50hp), dual turret lathes and 50 taper mills.

Model	Flow	Pressure	Outlets	Tank	Hydracell
V2-80	2 x 40 liters per minute	70 bar	2	380 liters	Optional
Options		Dimensions			
Oil Skimmer Chiller Mist Collector Cyclone Filtration Heater Wash Wand	1.88m x 1.57m x 0.71m				

V-60

The Chipblaster V-60 is fed by a transfer pump that draws from the machine tool sump, through the filter vessel to the integral 480 liter (126 gal) tank. When the machine tool calls for coolant, the filter pump(s) draw the coolant from the Chipblaster tank and pumps it to the inlet of the positive displacement pump. The coolant then flows at high pressure through a series of distribution and safety valves and on to the machine tool. Ideal for machine tools up to 30kw (40hp), dual turret lathes and 50 taper mills.

This user-friendly interface makes operating and managing the Chipblaster V-60 system faster and easier. The HMI is pre-programmed for multiple languages, provides easy-to-read, plain text alarm screens, records critical alarm history data, allows the operator to view PLC I/Os in real time, and much more.

Model	Flow	Pressure	Outlets	Tank	Hydracell
V-60	60 liters per minute	70 bar	1	480 liters	N/A
Options		Dimensions			
Oil Skimmer Chiller Mist Collector Cyclone Filtration Heater Wash Wand		1.88m x 1.57m x 0.84m			

V2-120

The Chipblaster V2-120 can operate as two completely independent 60 liter (16 gpm) modules or combine to provide high pressure and very high volumes 120 liters at any time during the same program. Ideal for machine tools up to 60kw (80hp), dual turret lathes and 50 taper mills.

This user-friendly interface makes operating and managing the Chipblaster V2-120 system faster and easier. The HMI is pre-programmed for multiple languages, provides easy-to-read, plain text alarm screens, records critical alarm history data, allows the operator to view PLC I/Os in real time, and much more.

Model	Flow	Pressure	Outlets	Tank	Hydracell
V2-120	2 x 60 liters per minute	70 bar	2	480 liters	N/A
Options		Dimensions			
Oil Skimmer Chiller Mist Collector Cyclone Filtration Heater Wash Wand		1.88m x 1.57m x 0.98m			

CHIPBLASTER ADDITIONAL ACCESSORIES

CHILLER SERIES

- 34,000 BTU
- Cooling capacity suits virtually all applications
- Optional heater for precise temperature control

Model	Dimensions
CC 34K	Included in base unit footprint
CC 34K SA	0.92m x 0.88m x 1.24m

FILTER SERIES

- Up to 100% filtering to 10 microns
- Up to 95% filtering to 5 microns
- Up to 50% filtering to 2 microns

Model	Dimensions
CF-79	Included in base unit footprint
CF-79 SA	0.97m x 0.69m x 0.64m

SLUDGE TANK

- Recommended to complement Chipblaster CF-79 cyclone filter. The Chipblaster sludge tank holds particulates outside of the machine-tool sump and is easy to access for cleaning.

Model	Dimensions
CB ST 200	0.67m x 0.46m x 0.95m

YOUR ONE-STOP-SHOP FOR MACHINE-TOOL PERIPHERALS

LNS provides a full range of bar feeders, chip conveyors, coolant management systems and air filtration systems which is second to none on the market. We are known in the industry for the solid expertise we have gained over several decades in an exceptionally wide range of applications, our excellent customer service and technical support. This support is ensured by highly qualified technicians who are available at key locations throughout Europe.
